EDUCATION

Eindhoven University of Technology (TU/e) <i>B.Sc. Computer Science & Engineering / Applied Mathematics</i> • Relevant Coursework: Algorithms & Data Structures, Operating Systems, Embedded Systems, Machine Learning, Linear Algebra, Calculus	Eindhoven, Netherlands <i>Sep 2023 — Jul 2027 (Expected)</i>
Baba Tonka High School of Mathematics <i>High School Diploma — Mathematics & Computer Science</i>	Rousse, Bulgaria <i>2018 — 2023</i>

WORK EXPERIENCE

Software Engineer & Product Manager Touchpulse • Integrated the university-built Pathway Teleassistance app into the company’s existing Tiera platform, bridging academic prototyping with production software • Architected and scoped new product features, operating across both engineering and product management responsibilities • Joined full-time following a university collaboration project with the same company	Feb 2026 — May 2026 <i>Netherlands</i>
Calculus Tutor Eindhoven University of Technology (TU/e) • Tutored undergraduate students in Calculus, covering limits, derivatives, integrals, and multivariable analysis • Assisted in problem sessions and provided individual academic guidance	Sep 2024 — Nov 2024 <i>Eindhoven, Netherlands</i>
Web Development Intern One For Fit (OFF) • Completed a summer internship focused on web development at a tech company	Summer 2020 <i>Rousse, Bulgaria</i>

PROJECTS

Pathway — Teleassistance App TU/e Industry Collaboration · Touchpulse • Developed a Teleassistance application as a university project in a team setting, subsequently adopted and integrated into Touchpulse’s production platform • Acted as both engineer and product architect throughout the full semester	Sep 2025 — Feb 2026 <i>Eindhoven, Netherlands</i>
Chinese Restaurant Website Freelance • Built a full-stack restaurant website using Laravel, Jetstream, and Livewire • Implemented authentication, dynamic menus, and responsive UI with the TALL stack (Tailwind, Alpine.js, Laravel, Livewire)	Summer 2020 <i>Rousse, Bulgaria</i>
Self-Hosted AI Infrastructure Personal Project • Deployed local LLM inference using Ollama on a VPS running Arch Linux • Integrated multiple AI APIs (OpenRouter, Anthropic Claude) into personal development workflows	2024 – Present <i>Eindhoven, Netherlands</i>

HONORS & AWARDS

1st Place — Eastern Competitive Programming Competition	2016 <i>Rousse, Bulgaria</i>
3rd Place — National Mathematical Linguistics Olympiad (Teams)	2019 <i>Bulgaria</i>
3rd Award — Teenhack Hackathon • Idea: smart fridge camera tracking products using computer vision	2020 <i>Rousse, Bulgaria</i>

- **Topic:** Future of Mobility — proposed an urban ecosystem integrating public transport with shared e-bike and e-scooter services

TECHNICAL SKILLS

- **Languages:** Python, C/C++, JavaScript/TypeScript, PHP, Bash/Shell
- **Frameworks & Tools:** Laravel, Livewire, Jetstream, Linux (Arch), Neovim, Docker, Git, Ollama, OpenRouter
- **Areas:** Embedded Systems, AI/ML Deployment, Full-Stack Web Development, Linux Systems Administration

LANGUAGES

- **English:** C2 — Cambridge CAE
- **Bulgarian:** Native
- **Chinese (Mandarin):** Native
